Education

University of Maryland, BS in Computer Science - Data Science Track Aug 2022 – Present

- **Expected Graduation:** December 2025
- **Selected Coursework:** Algorithms, Advanced Data Structures, Compilers, Computer Vision, Elementary Theory of Computation, Discrete Structures, Human Computer Interaction, Organization of Programming Languages

Experience

Front End Development Intern, Skan AI – Ottawa, ON June 2024 – Aug 2024

- Implemented UI components in **Angular/HTML/JS/CSS** for client/internal use
- **Collaborated with UX team** weekly designing **three custom web components**

Software/Data Analytics Intern, Metalmark Innovations – Cambridge, MA June 2022 – Sept 2023

- Designed and built **machine learning-based data analysis tools with Pandas/NumPy** for lab usage
- Developed **machine control programs** for testing/validation of the Tatama Air Purifier

Extracurriculars/Projects

Microsoft Hack4Good Hackathon: Peckham Inc. Jan 2025 - Apr 2025

- **Collaborating with team** of Microsoft employees building an **Agentic AI Platform** to match differently-abled individuals with job opportunities
- **Presenting** to Microsoft judges in March 2025 as part of the Hack4Good showcase
- Tools used: React, LLM, Azure, Semantic Kernel, YAML

Hack4Impact UMD - Technical Lead/Full Stack Engineer Aug 2024 - Present

- Leveraging **React/TS** along with **Tailwind, Firebase, Postgres, Heroku, APIs, Salesforce**, etc to build **cloud-deployed solutions** for non-profits including the Breastfeeding Center of Greater Washington
- **Managing eight engineers** while **meeting weekly** with client, product managers, and designers

Custom Racket/Assembly Compiler Dec 2024

- Built functional-language, self-hosting compiler including lexer, parser, Racket interpreter, and compiler
- Tools used: Racket/Scheme, Assembly

Image Stitching Algorithm Dec 2024

- Built a fully functional panoramic image stitching algorithm using SIFT, RANSAC, image warping/blending, and OpenCV tools
- Tools/Skills used: Python, OpenCV, Linear Algebra

Skills/Technologies

General Skills: Java, JS/TypeScript, C, C++, C, HTML, CSS, Python, Dafny, Haskell, Go, Rust, Dynamic Programming, AWS, Azure, Docker/Containers, SQL, Maven, Perl, XML, Firebase/Firestore, MongoDB, Scala, Kafka, TensorFlow, PyTorch, OpenCV

Front End Design: HTML/CSS, Angular, React, PHP, D3.js, Swift, Kotlin, Tailwind, Next.js, Vue.js

REST API Design: Ruby-on-Rails, Python/Flask, PostgreSQL

Collaborative Skills:

- Professional work in both professional/extracurricular settings (Skan AI, Metalmark Innovations/Hack4Impact UMD, Hack4Good)
- Proficiency in Git/Version Control, Agile Scrum methodology
